

Question 9

Step 1 :

Create a pub/sub and give a topic to it.

Step 2 :

Create a cloud function and attach it to your pub/sub topic.

Step 3 :

Create a bigquery dataset from google cloud console.

Step 4 :

Create a bucket and add a sample json file in the bucket.

Step 5 :

Publish the message from the pub sub by giving bucket name and object path of the json.

Step 6 :

Check for the execution status in the logs of the cloud function.
