Question 7

Select the Firewall rules whose logs are required

Ensure that Logs are On

Also ensure that the user you are signed in currently has a Logging Admin Role or equivalent role to allow and create sinks for exporting

Now Navigate to Logging and set the filter to the desired firewall to view the logs

Now click on Create Export

Assign a name to the sink for exporting

Select the Sink Service as BigQuery and Assign it to a desired Dataset or create a new one in Bigquery

Lastly click on Create Sink to create and export the logs
